The Diode Difference

XM0160D

At Diode Dynamics, we conduct all necessary engineering and testing for our products internally in St. Charles, Missouri. Unlike other manufacturers, we test our lights, to check the resulting performance and output. We conduct this testing in-house with our goniometer, which is a machine that slowly rotates the lamp, and measures the effective beam pattern.

 **ASSEMBLED IN USA**

Many of our products are proudly produced in-house by our manufacturing division. This allows us to maintain complete quality control with the final application in mind and deliver products to the market much quicker than others in the industry.

STAGE SERIES VEHICLE KITS

Looking to mount an LED pod to your vehicle? Look no further! At Diode Dynamics, we have designed a variety of road-legal and off-road LED pod bracket kits to fit specific makes and models. The application-specific brackets included in our LED pod vehicle kits were CAD-designed to easily install using factory mounting points. This makes the process of adding auxiliary lighting to your vehicle as simple as possible. No cutting or drilling required!
