

# 3-IN-1 LIGHTING UPGRADE

REVERSE LIGHT

RUNNING LIGHT W/ TAIL LIGHTS

4TH BRAKE LIGHT (AVAILABLE W/ C1R)

## The Diode Difference

XM0211

At Diode Dynamics, we conduct all necessary engineering and testing for our products internally in St. Charles, Missouri. Unlike other manufacturers, we test our lights, to check the resulting performance and output. We conduct this testing in-house with our goniometer, which is a machine that slowly rotates the light, and measures the effective beam pattern.

## ASSEMBLED IN USA

Many of our products are proudly produced in-house by our manufacturing division. This allows us to maintain complete quality control with the final application in mind and deliver products to the market much quicker than others in the industry.

Running Light W/ Tail Lights

### EASY SNAP-IN INSTALL!

- 1 Unplug the factory connector
- 2 Install the Plug-&Play connector
- 3 Snap it in!

### FITS ANY VEHICLE!

With 7-Pin Harness

The HitchMount LED Pod comes with a harness that fits behind your bumper, and connects to the back of any standard 7-pin trailer connector. This provides a Plug-and-Play solution for over 90% of trucks on the road. Additional harnesses are available for certain vehicles which do not use a standard connector, or vehicles that are equipped with trailer detection systems as part of advanced towing packages.

SNAPFIT DESIGN

Stock Reverse

Stock Reverse + C1 HitchMount

### BRIGHTER BACKUP

Factory reverse bulbs don't provide enough light output to back up at night confidently. By pairing our patented TIR optics with high-powered LEDs, the SSC1 and C1R provide an additional reverse light that's several times brighter than stock bulbs alone.

LOCKABLE DESIGN

EASY REMOVAL FOR TOWING

8-YEAR WARRANTY

NO CUTTING OR SPLICING
